Consent Form for Usability Testing

Project Title: MLHEALTH AI Model Training Interface Study

Researcher: Kara Kartallar Team

Institution: Çankaya University

Date: April 28, 2026

1. Purpose of the Study

The goal of this study is to evaluate the usability of a 7-step AI model training process (Tasks T1–T7). Your feedback will help us improve the interface and user experience.

2. Procedure

As a participant, you will be asked to complete 7 specific tasks related to training an AI model. This session is expected to take approximately 10-15 minutes.

3. Data Collection & Recording

To analyze the results, we will record:

- **Screen Activity:** A video recording of your interactions with the software.
- **Audio/Voice:** A recording of your "think-aloud" process as you navigate the tasks.

4. Confidentiality & Anonymity

All data collected will be used strictly for academic purposes within this school project.

- Your name will **not** be linked to the video or audio recordings.
- In the final report, you will be referred to as "Participant 1" to ensure **complete anonymity**.
- Video files will be stored securely and deleted after the project is graded.

5. Voluntary Participation

Your participation is entirely voluntary. You may choose to stop the test at any time or skip any task without any penalty.

---

6. Participant Consent

By signing below, I acknowledge that:

- I have read and understood the information above.
- I give my permission for my screen and voice to be recorded for the purpose of this study.
- I understand that my identity will remain anonymous in any project deliverables.

Participant Name: Umut Kovaşgın

(Leave blank if the participant prefers to remain fully anonymous on the form itself)

Participant Signature: [signature]
